BODY OF REPORT:

On 08/09/2020 at approximately 10:35 hours, I, Deputy Williams was requested by COMIT Deputy Zamudio to assist him with his traffic stop at I-35 northbound between 122nd and the Turnpike.

Upon arrival, Zamudio stated he had stopped the above listed vehicle and believed there to be narcotics inside the vehicle and asked if I could run my dog on the vehicle. I went to my vehicle and retrieved my state certified narcotic detection canine (Cairo). I had Cairo perform a free air sniff of the vehicle. I began Cairo at the rear driver side tail-light of the vehicle. Cairo began to work in a counter clockwise motion. When Cairo got to the passenger rear tail-light of the vehicle he gave me distinct change of behavior by immediately beginning to bracket the rear hatch of the vehicle. Cairo placed his nose on the seal of the rear hatch and gave me trained final positive alert to the presence of the odor of narcotics inside the vehicle.

I advised Zamudio of the alert as I was placing Cairo back in my vehicle. A roadside probable cause search of the vehicle was conducted. COMIT deputy Gradick and Barton opened the rear hatch of the vehicle and located a large quantity of what appeared to be meth. The roadside search was halted at this time and the vehicle was taken back to the COMIT office for processing.

Once at the COMIT office, I assisted in the secondary search of the vehicle. While searching the vehicle numerous bags were located in the rear hatch of the vehicle containing the above listed narcotics.

After the narcotics were removed from the vehicle, I conducted two field test of the crystal like substance with NIK style test kits. Both presumptive tests showed positive for methamphetamine. (photos)

See other COMIT member reports for further.
